

usd Security Awareness Platform

Use our e-learning solution. Meet your compliance requirements.

To enable employees to contribute to a high level of security, it is crucial to train them in the fields of information security and data protection. In addition, all major security standards require implementation of security awareness measures.

Benefits of the usd Security Awareness Platform

- Validate compliance and monitor training progress
- Reduce organizational and financial efforts
- Conduct flexible training sessions without any time or location restraints

Straightforward E-Learning

Using the usd Security Awareness Platform is easy and inexpensive. Sign up at <https://my-awareness.usd.de/en/register>, select trainings, create users and have your employees start training immediately.

Practical Contents

All trainings deal with what is relevant for your employees with regard to cyber risks and data protection in their daily work. All content is presented realistically and comprehensibly.

Individual Pricing

Depending on the scope and content of your training project, different price models and free training courses are available to you.

PCI DSS Certifications

The functionalities of the usd Security Awareness Platform and the generated reports meet the requirement for the annual education of employees on security guidelines stipulated in PCI DSS requirement 12.6.2.
